## INTRODUCTION

I'm graduate from Viet Nam Aviation Academy and work as an checkin staff for 5 years. But my job have been cutdown a lot due to Covid 19 and I decide to change my direction to be a developer. My 2 most familiar language is Javascript and Golang since I have working with it for more than 3 years. I also can have experience in ReactJS and Python. My aim is to be a master at backend development focus on developing a high performance, maintainable application for any kind of project.

I have a very good knowledge about many aspect of programming like: OOP, algorithm and data structure, clean code designing, database, programming language, unit test, intergration test ... I'm dedicated, good English speaker, no problem learning new thing, work hard and responsible on the job. I hope to get a chance to communicate for job oppotunity in your company. Thank you a lot!

## EDUCATION

### Air Traffic Management

JUNE 2009 - JUNE 2014

### Viet Nam Aviation Academy

Bachelor Degree

## SKILL

### Web developer

APR 2020 - CURRENT

ReactJS, NodeJS

Golang (go routine, go channel, mutex, ...)

Data structure (array, linklist, hashmap, queue, stack, ... ) and Algorithm, Time complexity, Space complexity

Design pattern, Clean Code, Unit Test, Intergration Test, TDD, Solid principle

Oracle, Postgres, Mysql, Mongo (index, transaction, scale up)

Redis, NSQ, Message Queue

Linux system, bashscript

Git, CI/CD, Jenkin

Docker, Kubernetes

AWS, EC2, S3, VPC

## WORK EXPERIENCE

### Backend Golang developer

OCT 2022 - APR 2023

#### AENCO

##### Project: Blockchain app

Developer a blockchain app let people manage account and trading coin

Discuss and design system, database, code API function, unit test

Coordinate and work with frontend and fix bug, review code

Deploy app using Jenkin, write library for common code

Teamsize: 6

Technology: Golang, NSQ, Redis, Mysql, Blockchain provider

##### Project: DNA application

Design source code from scratch, 3 layer for separate logic

Code on both frontend using ReactJS and Backend using Golang to process a file upload by client and show on UI the result

Design database, optimize using index

Teamsize: 1

Technology: Golang, ReactJS, Squilite, Python

### Backend Golang, NodeJS developer

JAN 2021 - SEP 2022

#### ALTISSS

##### Project: System for a stock project

Developer a stock trading app, calculate interest stock, manage account, transaction

Reading document about the requirement of the project and design structure of the project and database

Writing technical and user document, demo project for customer, support them about the project

Teamsize: 4

Technology: Golang, NodeJS, ZMQ, Oracle database, Linux

### Full stack NodeJS ReactJS developer

APR 2020 - JAN 2021

#### PKH AJSC

##### Project: Health check schedule booking

Developer backend and frontend for booking health check schedule system

Design Database Mongodb in order to match the logic

Setup API with Express framework for client to call, get data, edit data. Use

Redis as a message queue, firebase to push notification

Teamsize: 5

Technology: NodeJS, Express, Nest, ReactJS, Mongo, Firebase

## ADDITIONAL INFORMATION

Hometown: Ca Mau

I have worked in Aviation field for a 5 years

Football, table tennis

Go to some neglected place to rest myself on that peaceful scenery  
Music, can play piano and guitar very well

CARRER OBJECTIVE

I will be dedicated to take my  
Backend skill into the master level

LANGUAGE

Vietnamese native  
English fluent

CERTIFICATIONS

TOEIC score 875  
Bachelor's Degree  
Office Computing
