Company About

At ST Engineering, we apply our technology and innovation to solve real-world problems and improve lives. Our dedication to excellence and our strong track record have earned us a distinctive reputation for quality and trust as a global technology, defence and engineering group. Our diverse portfolio of businesses spans the aerospace, smart city, defence and public security segments.

We succeed because of our ability to deliver what our partners and customers need. Together, we transform and future-proof cities to make them more mobile, more secure and more liveable for communities. With our expertise and facilities around the world, we keep aircraft flying safely and seagoing vessels operating efficiently.

We help nations protect their citizens by meeting their air, land and sea defence needs and equipping their fighting forces to perform on the battlefield. Our cybersecurity and critical systems help our customers enforce public and homeland security in an increasingly digital world. And our satellite communications equipment contributes to much of the world's network connectivity.

Our global network of subsidiaries and associated companies spans Asia, Europe, the Middle East and the U.S.

In the U.S., our major operations span over 50 cities in 23 states, employing 7,000 people who provide innovative products and solutions to commercial and government customers across diverse market segments.

We meet every challenge with an effective and competitive response so that our customers in more than 100 countries are better prepared, better protected, and better connected for a more sustainable future. The power behind all of this is our global workforce, inspired by a common commitment and vision. Ours is a team that knows what it takes and we are committed to challenging, changing and securing the future.
